- Well Water
- Municipal Water
- Industrial Applications
- Commercial Applications

What Makes Your Water More Cleaner!

- GRAVEL
- SAND
- ACTIVATED CARBON

VALVE HEAD KEY FEATURES

- Fully adjustable cycle times
- Reliable, precise and easy to operate valve
- User-Friendly LCD display shows pertinent information

Water Filter Housing 20 inch for Domestic and Industrial Water Purifiers.

20 inch in-line set Big Blue Jumbo Water Filter Housing, with pressure relief valve. Head is equipped with pressure relief valve which enables release of air accumulated after cartridge replacement. Big Blue Water Filter Housings offer the versatility to meet all your large-capacity filtration needs, compatible with a broad range of application and are available with a pressure relief button. They accept a wide variety of 4-1/2" diameter cartridges.

An affordable whole home water system from Sole Aqua provides:

- Removal of chlorine taste and odor, hardness minerals, and sediment.
- A layer of coconut-shell carbon that filters the water throughout the home without compromising water flow.
- Great tasting, healthier water in every outlet.
- Prevention of scale build-up on pipes, faucets and water using appliances.
- Soft water so you can use up to 75% less soaps, cleaners, and shampoos according to the Battelle Institute.

Clean Less, Live More

While saving up to 75% on cleaning products can be enough to pay for a water softener, what's even more valuable is your time. Stop scrubbing, folks, there's a better way! Hard water minerals buildup on faucets, fixtures, dishes, glassware, & stemware and leave you using chemicals to clean up the mess. Sole Aqua softener saves your time & money so you can clean less and live more.

Softer Skin & Hair

Hard water minerals bonds with skin and hair leaving a nasty film. Kind of like that timescale on your faucet! Whole House Water softener removes hardness minerals naturally so you can stop spending money on lotions & skin care products as your body becomes free of buildup!

All-In-One Technology

Sole Aqua systems use proprietary technology to combine all your whole home water treatment into one. Reduce chlorine, soften water, and remove sediment in one system. Makes for simple maintenance and a lot less cost!

Extend Appliance Life

Dishwashers, washing machines, water heaters (tankless, electric, & gas), ice maker, boiler systems, & humidifiers all suffer when your water contains hardness minerals. Do them a favor (and your pocketbook) and give them soft water.

Plus you can save up to 40% on energy costs related to your water-using appliances – that's pretty awesome!
